Introduction

Welcome to the **ZAIZENS Integrated HMS Cashier User Manual**. The Cashier module is the financial front line of the hospital — collecting fees, issuing payment codes, managing receipts, and enabling clinical departments to verify paid services.

Cashier Command Center: One workspace at `/cashier` for pending payments, OPD orders, IPD settlement, emergency bills, issued codes, and doctor prescriptions.

1. Cashier Overview & Roles

The **Cashier module** connects patient payments to clinical workflows across OPD, IPD, Emergency, Maternity, Lab, Radiology, and Pharmacy.

Cashier
Collect payments, issue codes, print receipts, wallet deductions, BetterPay confirmation

Front Desk
Route patients to cashier before OPD queue; issue prepayment for walk-ins

Doctor
Generates orders requiring payment; department-specific service codes after settlement

Lab / Radiology / Pharmacy
Verify payment codes before processing orders

Accountant
Billing workspace, receipts register, financial reports

Patient
Pays at cashier or via wallet/BetterPay; carries codes to departments

Key URLs

Screen	Path
Cashier Command Center	/cashier
Cashier portal	/portal/cashier
Settle ticket	/cashier/settle/:ticket_id
IPD settle modal	Cashier → IPD Payment tab
ER settle modal	Cashier → Emergency tab
Wallet hub	/wallet
Billing / receipts	/billing

Permissions: `cashier.read` view tickets · `cashier.write` collect payments · `billing.write` adjustments

2. Command Center Workspace

The revamped **Cashier Command Center** organizes all payment activity in color-coded tabs:

 Pending Payments

 Payment History

 OPD Payment

 IPD Payment

 Emergency

 Codes Issued

 Doctors Rx

KPI strip

- **Today revenue** — payments collected today
- **Pending queue** — tickets awaiting collection
- **Wallet payments** — deductions today
- **Wallet hub** — quick link for top-ups

Quick code lookup

Enter any payment code (e.g. `PAY-2026-00000036`) to open settlement screen instantly.

Issue payment button

Opens prepay modal for walk-in services: consultation, lab, imaging, maternity, surgery catalog items — with doctor assignment and insurance options.

3. Standard Payment Workflow

Patient arrives → Cashier collects fee (or wallet/BetterPay)
→ Payment code issued → Patient goes to clinical department
→ Staff enters code to verify payment → Service processed

OPD standard flow

1 Patient pays **consultation fee** at cashier first.

2 Receives consultation payment code.

3 Front Desk adds patient to OPD queue.

4 After doctor visit, patient returns for **order payment** (lab/rad/pharmacy).

5 Departments verify codes before processing.

Emergency exception

Emergency/A&E patients bypass prepayment — billing is **retrospective** after clinical care on the credit tab.

4. Issue Payment & Prepay

Walk-in prepayment

- 1 Click **Issue payment** on Cashier Command Center.
- 2 Search and select patient (or create from maternity/OPD deep link).
- 3 Choose service type: consultation, laboratory, radiology, maternity, surgery, general service.
- 4 Select catalog item and assigned doctor if required.
- 5 Apply insurance co-pay % if on file.
- 6 Choose payment method (see Section 6).
- 7 Confirm — ticket created in **Pending** queue or settled immediately.

Maternity deep links

Maternity chart billing panel can open cashier with pre-filled MAT event (`?prepay=1&maternity_event=...`).

BetterPay retry

Failed or timed-out BetterPay sessions show **Retry** on pending tickets — reopens QR payment flow.

5. Payment Methods

 Cash

 MoMo

 Orange Money

 Bank

 BetterPay QR

 Wallet

 Insurance

 Mixed

Method	When to use
Cash	Physical FCFA at desk — default
MoMo / OM	Mobile money transfer confirmed by cashier
Bank transfer	Corporate or large payments with reference
BetterPay	Patient scans QR or opens link; cashier confirms receipt
Wallet	Deduct from pre-paid patient wallet balance
Insurance	Split insurer share vs patient co-pay automatically

On settlement screen (`/cashier/settle/:id`), select method, review line items, and click **Collect Payment**.

6. Payment Codes & Validity

Each settled service generates a unique **payment code** (e.g. `CON-4829-K7HM3R9Q` , `PAY-2026-00000036`).

Code purposes

- Verify payment at Lab, Radiology, Pharmacy stations
- Track partial payments on multi-line tickets
- Support OPD follow-up within validity rules
- Link doctor orders to department-specific codes (Lab / Rad / Pharm badges)

Validity rules

Consultation codes may expire based on:

- Configured validity days (Settings → Payment validity)
- Maximum uses per code
- Doctor-documented follow-up interval

Lab, radiology, pharmacy, IPD, and emergency codes are checked for paid status — not time expiry.

Codes Issued tab

Search all generated codes with type, status, date, and print links.

7. OPD Payments

OPD Payment tab lists consultations with unpaid order lines:

- 1 Filter by patient name or consultation number.
- 2 Review pending items and total due.
- 3 Click **View / Bill** — opens OPD orders bill modal.
- 4 Collect full or partial payment per line.
- 5 Issue department codes (Lab, Rad, Pharm) shown on Doctors Rx tab.

Partial payment

Same consultation can accept multiple payments until balance zero — patient reuses ticket until fully paid.

Refunds

Refund action on eligible consultations — requires authorization; reverses or adjusts ticket lines.

8. Consultation Fees

General vs specialist consultation

Service catalog distinguishes:

- **General consultation** — any doctor
- **Specialist consultation** — requires matching specialisation

Cashier assigns doctor at prepay; system validates catalog rules.

Telemedicine

Teleconsultation tickets follow consultation validity rules when enabled.

Follow-up visits

Returning patients may use existing payment code if doctor marked follow-up eligible and validity passes — otherwise new consultation fee required.

9. IPD Settlement

IPD Payment tab shows inpatients awaiting financial discharge:

- 1 Filter by patient, ward, or bed.
- 2 Review running bill: deposit, charges, balance due.
- 3 Open **IPD Settle** modal.
- 4 Enter or validate IPD payment code.
- 5 Collect final settlement — mark Financial Discharge.
- 6 Bed released for housekeeping on ward board.

IPD charges include ward fees, lab, radiology, pharmacy, procedures accumulated during stay.

10. Emergency / A&E Billing

Emergency tab (A&E badge) lists patients with unpaid credit tab charges:

1 Clinical care completed on ER chart (disposition confirmed).

2 Cashier presents retrospective bill from open tab total.

3 Collect via standard payment methods or wallet.

4 Issue EMG settlement code — closes ER visit financially.

Emergency patients do not pay before triage — always collect after stabilization unless policy requires deposit.

11. Maternity & MAT Tickets

Maternity module payment tickets link to ANC events:

- ANC booking (first visit)
- ANC routine visits
- Labor ward admission
- Delivery types (SVD, CS, etc.)
- Postnatal routine
- NICU per day

From maternity chart **Billing** panel: view paid/due, MAT tickets on file, **Collect at cashier** deep link with event pre-selected.

12. Wallets & Top-ups

Pre-paid wallets at `/wallet` enable cashless department payments:

- 1 Search patient — create wallet if none exists.
- 2 **Top-up** — receive cash at desk, credit virtual balance.
- 3 Patient shows wallet QR at Pharmacy/Lab for automatic deduction.
- 4 At settlement, choose **Wallet** method if balance sufficient.

GBPay MoMo auto-credit when patient sends to wallet QR (if configured).

If wallet insufficient, use **Go to Wallet & Top-up** from settlement screen, then retry wallet payment.

13. BetterPay QR Payments

QR workflow

- 1 Select **BetterPay** as payment method on prepay or settle.
- 2 System displays QR code and payment link.
- 3 Patient scans or opens link on mobile.
- 4 After payment on BetterPay, cashier clicks **Confirm payment received**.
- 5 Ticket marked paid — codes issued.

Configure BetterPay partner ID under Accounting → Settings → Payments. Pending BetterPay tickets show badge and retry option.

14. Insurance Co-pay

When patient has insurance on clinical chart:

- System applies configured **insurer share %**
- Settlement screen shows: Insurer pays / Patient pays split
- Manual override checkbox for exceptional cases

Primary insurer set on patient chart or insurance hub (`/insurance`).

15. Refunds & Receipts

Receipts

- Print receipt after every collection
- Payment History tab — search past transactions
- Billing workspace — fiscal documents register
- Service codes printed on settlement for patient to carry to departments

Doctor prescriptions print

Doctors Rx tab — print prescription with Lab/Rad/Pharm codes for patient handoff.

Refunds

OPD refund modal for eligible consultations — documents reason, adjusts financial records per policy.

17. Troubleshooting

Issue	Solution
Code not accepted at lab	Confirm ticket status paid; check correct department code (Lab vs Rad vs Pharm)
Consultation code expired	Check validity rules; patient needs new consultation payment
Cannot assign doctor	Specialist service requires matching doctor specialisation
Wallet payment fails	Top up wallet first; verify wallet exists for patient
BetterPay not confirming	Verify partner ID configured; patient must complete payment before confirm
IPD not in settle list	Doctor must sign clinical discharge first
ER ticket missing	Confirm disposition and open credit tab on ER visit chart
Insurance split wrong	Update insurer share on patient chart; check manual override
Partial payment stuck	Reopen same ticket from Pending; collect remaining balance

18. Glossary

Term	Definition
Payment code	Unique alphanumeric ticket identifier for a paid service
Ticket	Payment record in tbl_payment_ticket (pending or paid)
Prepay	Payment before clinical service (standard OPD flow)
Settlement	Final payment collection closing a bill
Co-pay	Patient portion when insurance covers remainder
Credit tab	Running unpaid charges (ER/IPD)
MAT ticket	Maternity module payment linked to obstetric event
BetterPay	QR/mobile payment partner integration
Wallet	Pre-paid patient balance for cashless deductions
Follow-up	Return visit under existing consultation code validity
