Introduction

Welcome to the **ZAIZENS Integrated HMS Hospital Director User Manual**. The Director module is the executive intelligence layer of your hospital — aggregating live operational, clinical, financial, and workforce data into dashboards and reports designed for governance, strategic planning, and day-to-day leadership decisions.

Director Portal: Your executive home at `/portal/hub/director` — daily dashboard, weekly report, monthly P&L, annual scorecard, and quick links to management reports and analytics.

1. Director Overview & Roles

The Hospital Director module serves executive leadership and their support staff. Access is permission-driven — no widget or report appears unless explicitly granted in Access Control.

Hospital Director / CEO

Full executive suite — all dashboards, management reports, and strategic scorecards at `/portal/hub/director`.

Medical Director

Clinical quality focus — daily census, ER flow, clinical alerts, morbidity/mortality, infection control reports.

Finance Director / CFO

Financial tab, monthly P&L, unit economics (pharmacy, lab, radiology, theatre, IPD), AR ageing.

Assistant Director

Operational oversight at `/portal/hub/assistant-director` — beds, flow, revenue, alerts (subset of director suite).

Director's Secretary

Executive support at `/portal/hub/secretary` — calendar, briefings, management reports (read), correspondence.

System Administrator

Configures permissions at `/hms-admin/access` — grants report sections, KPIs, panels per role.

Key routes

Screen	Route	Purpose
Director portal	<code>/portal/hub/director</code>	Executive hub with report tabs
Management reports	<code>/management-reports</code>	Live catalogued report cards (Daily / Weekly / Monthly / Financial)
Reports hub	<code>/hms-reports</code>	Central reports navigation
Print / PDF	<code>/management-reports/print</code>	Print current tab or full suite
Assistant Director	<code>/portal/hub/assistant-director</code>	Deputy operational dashboard
Secretary	<code>/portal/hub/secretary</code>	Executive assistant workspace
Access control	<code>/hms-admin/access</code>	Grant report & dashboard permissions

2. Director Portal Hub

The Director Portal is the landing page for hospital executives. It hosts the React-powered **DirectorPortalShell** with tabbed access to daily, weekly, monthly, and annual views — each visible only when the user's role has the corresponding permission.

Portal navigation

- 1 Sign in with a director-enabled role — home portal routes to `/portal/hub/director` .
- 2 Use the **Director reports** tab bar to switch between Daily, Weekly, Monthly, and Annual views.
- 3 URL parameter `?report=weekly` deep-links to a specific report (e.g. share with board members).
- 4 Sidebar tile **Management Reports** opens the full live report catalog at `/management-reports` .
- 5 Top navigation **Operations** → **Management Reports** provides the same entry when sidebar is collapsed.

Portal tiles (typical)

Portal tiles are configurable in Access Control under the **director** portal catalogue. Administrators can add, reorder, or hide tiles per deployment.

3. Daily Dashboard

The **Daily Dashboard** provides real-time operational intelligence — patient volume, bed occupancy, ER wait times, revenue collection, staff on duty, and critical alerts. Data refreshes from live hospital transactions.

Dashboard tabs

Tab	Permission	Content
Overview	<code>director.dashboard.tab.overview</code>	KPI strip, patient flow chart, revenue breakdown, critical alerts
Bed map	<code>director.dashboard.tab.beds</code>	Ward-by-ward bed occupancy grid
Patient flow	<code>director.dashboard.tab.flow</code>	Admissions, discharges, net inpatients
Staff roster	<code>director.dashboard.tab.staff</code>	On-duty staff attendance snapshot
Revenue	<code>director.dashboard.tab.revenue</code>	Collected vs. billed, collection rate
Alerts	<code>director.dashboard.tab.alerts</code>	Lab/radiology delays, pharmacy stock alerts

Key KPIs (Overview)

KPI	What it measures
Patients today	Total OPD + ER + IPD encounters for the current day
Bed occupancy	Occupied beds ÷ total operational beds (%)
ER average wait	Mean time from triage to doctor consultation
Revenue today	Cash and insurance collections posted today
Staff on duty	Clinical and support staff currently clocked in
Pending lab results	Orders awaiting finalization beyond SLA threshold

Panels

- **Patient flow** — hourly admission/discharge trend
- **Revenue by category** — OPD, IPD, pharmacy, diagnostics breakdown
- **Critical alerts** — deaths, ICU census, incident flags
- **Ward bed occupancy** — colour-coded bed grid per ward
- **Staff attendance** — roster vs. scheduled
- **Lab & radiology alerts** — overdue results, equipment issues
- **Pharmacy stock alerts** — low stock, expiry warnings

Morning briefing: Open the Daily Dashboard before stand-up meetings. Cross-check KPIs with the Daily tab in Management Reports for narrative detail on census, theatre, and clinical alerts.

4. Weekly Performance Report

The **Weekly Performance Report** shifts from same-day pulse to seven-day trends — patient volume, occupancy, average length of stay (ALOS), revenue, ER wait, safety incidents, and supply chain digest.

Weekly KPIs

KPI	Description
Total patients	Aggregate encounters for the rolling 7-day period
Avg bed occupancy	Mean ward occupancy across the week
Avg ALOS	Average length of stay — days from admission to discharge
Weekly revenue	Total billed and collected for the week
Avg ER wait	Seven-day mean ER waiting time
Safety incidents	Reported incidents and near-misses

Weekly panels

- **Patient volume** — daily bar chart for the week
- **Bed occupancy trend** — line chart vs. prior week
- **Revenue — billed vs. collected** — daily comparison
- **ALOS by department** — specialty breakdown
- **Doctor performance** — consultations and throughput
- **Safety incidents** — incident log summary
- **Supply chain digest** — reorder alerts, PO status

Weekly Performance Report

4,218

Total patients

74%

Avg occupancy

3.2d

Avg ALOS

18.6M

Weekly revenue

Patient volume · Occupancy trend · Revenue chart · ALOS · Doctor perf · Incidents · Supply digest

5. Monthly P&L Report

The **Monthly P&L Report** presents financial performance for governance — revenue, gross profit, EBITDA, payroll costs, department P&L, expense vs. budget charts, and insurance claims ageing.

Monthly KPIs

KPI	Description
Total revenue	All revenue streams for the calendar month
Gross profit	Revenue minus direct cost of services
Gross margin	Gross profit as percentage of revenue
EBITDA	Earnings before interest, taxes, depreciation, amortization
EBITDA margin	EBITDA as percentage of revenue
Payroll cost	Total staff compensation for the month

Monthly panels

- **P&L statement** — line-by-line income statement summary
- **Revenue by source** — OPD, IPD, diagnostics, pharmacy, theatre
- **6-month revenue trend** — rolling half-year chart
- **Expenses vs. budget** — variance analysis by category
- **Department P&L** — profit contribution by clinical department
- **Payroll by department** — staffing cost distribution
- **Insurance claims aging** — 30 / 60 / 90-day outstanding claims

Monthly figures integrate with the Finance module. Accountants post journal entries; director dashboards reflect posted GL data. Unposted transactions may not appear until synchronized.

6. Annual Performance Scorecard

The **Annual Scorecard** provides a board-ready view of hospital performance across five strategic domains, with multi-year trend analysis and domain radar visualization.

Scorecard panels

- **Overall performance** — hero summary with composite score
- **Domain radar** — pentagonal radar chart across five domains
- **5-year performance** — longitudinal trend for strategic planning

Each domain has granular ACL permissions (`director.annual.domain.*`) so boards can share clinical quality without exposing financial detail, or vice versa.

Use the annual scorecard for board meetings, donor reports, and ministry submissions. Export via Print from Management Reports or portal browser print for PDF archival.

7. Live Management Reports

`/management-reports` is the comprehensive live report suite — organized into four frequency tabs with colour-coded themes. Each tab contains report **cards** with bullet-point metrics loaded from live hospital data.

Live Management Reports — /management-reports

Daily

Weekly

Monthly

Financial

Patient census · OPD & emergency · Theatre · Clinical alerts · Pharmacy · Daily revenue

Report sections

Tab	Permission	Theme	Focus
Daily	<code>hms_reports.daily</code>	Cyan	Operational pulse — census, ER, theatre, alerts
Weekly	<code>hms_reports.weekly</code>	Violet	Trend monitoring — flow, HR, quality, supply
Monthly	<code>hms_reports.monthly</code>	Blue	Strategic overview — clinical perf, P&L, satisfaction
Financial	<code>hms_reports.financial</code>	Emerald	Transactions & unit economics

Using management reports

- 1 Open `/management-reports` from sidebar, portal tile, or reports hub.
- 2 Select a frequency tab — only tabs granted to your role appear.
- 3 Review report cards — each card lists live metrics as bullet points.
- 4 Check the **generated at** timestamp and report reference in the header.
- 5 Click **Refresh** to reload live figures from the database.
- 6 Use **Print tab** or **Full PDF** for board packs (see Print section).

Core permissions

Permission	Grants
<code>hms_reports.read</code>	Open module (any granted section)

<code>hms_reports.full</code>	Full director suite — all sections and cards
<code>hms_reports.daily</code>	Entire Daily tab
<code>hms_reports.weekly</code>	Entire Weekly tab
<code>hms_reports.monthly</code>	Entire Monthly tab
<code>hms_reports.financial</code>	Entire Financial tab

If you see **No reports assigned**, your role lacks management report permissions. Contact an administrator to grant `hms_reports.read` plus the relevant section permissions.

8. Daily Report Cards

The Daily tab covers same-day operational metrics across six report cards:

Card	Key metrics
Patient census	Admissions, discharges, inpatient count by ward, bed occupancy %, pending admissions, transfers
OPD & emergency	Outpatient visits, ER cases, average wait time, walk-ins vs. appointments, referrals
Theatre & procedures	Surgeries scheduled vs. done, utilisation rate, cancellations, turnaround time
Clinical alerts	Deaths, ICU/HDU census, critical lab values, incidents, infection alerts (HAI)
Pharmacy	Prescriptions dispensed, stock alerts, high-value consumption, returns/waste
Daily revenue snapshot	Cash collections, insurance billing, outstanding balances, pending discharge invoices

Individual cards can be granted separately (e.g. `hms_reports.daily.census`) for department heads who need census without financial detail.

9. Weekly Report Cards

The Weekly tab monitors seven-day trends across six domains:

Card	Key metrics
Patient flow trends	Weekly admissions vs. prior week, ALOS, 7-day readmission rate, specialty distribution
HR & staffing	Attendance, absenteeism, overtime, on-call gaps, locum usage, pending leave
Lab & radiology	Tests ordered vs. completed, TAT, critical results, equipment downtime
Quality & safety	Complaints, incident summary, pressure ulcers/falls, hand hygiene compliance
Supply & inventory	Consumption vs. budget, reorder levels, POs raised/pending, expired items
Weekly financial	Revenue by department, insurance claims submitted, collections vs. target, top debtors

10. Monthly Report Cards

The Monthly tab supports strategic governance with six report cards:

Card	Key metrics
Clinical performance	Morbidity/mortality, top 10 ICD diagnoses, surgical outcomes, ALOS vs. benchmark, 30-day readmissions
Departmental activity	OPD visits per doctor, procedures per specialty, theatre utilisation, referral in/out, no-show rate
P&L summary	Revenue vs. budget, operating expenses, net surplus, cost per patient day, revenue per bed
Patient satisfaction	CSAT/NPS scores, complaint resolution, feedback by department, waiting time satisfaction
Infection control	HAI rates by ward, antibiotic consumption (DDD), AMR alerts, sterilisation compliance
Assets & maintenance	Equipment downtime, preventive maintenance, capex vs. plan, repair requests

11. Financial Reports & Unit Economics

The Financial tab provides transaction-level and unit-level economics for executive financial oversight.

Financial report rows

Report	Frequency	Content
Daily transaction summary	Daily	Cash, card/mobile, insurance claims, refunds, collections vs. target
Daily expense log	Daily	Petty cash, utilities, consumables, emergency purchases
Weekly transaction report	Weekly	Revenue by payer, outstanding invoices, reconciliation, collections trend
Weekly procurement	Weekly	POs issued, goods received, supplier payments, pending LPOs
Monthly P&L	Monthly	Revenue vs. budget, operating costs, EBITDA, net surplus, cost per patient
Monthly expenses	Monthly	Salaries, utilities, maintenance, consumables, depreciation vs. budget
Monthly accounts receivable	Monthly	Debtor ageing (30/60/90 days), insurance claim status, bad debt provisioning

Unit economics (cost centres)

Unit	Sales tracked	Purchases / costs
Pharmacy	Prescriptions, OTC, drug revenue by category	Drug purchases, supplier invoices, stock valuation, write-offs
Laboratory	Tests billed (cash & insurance), revenue per test	Reagents, kits, equipment servicing
Radiology	X-ray, CT, MRI, ultrasound per modality	Films/contrast, equipment maintenance
Theatre	Surgical fees, anaesthesia billing	Consumables, sterile supplies, implants
IPD / Wards	Bed charges, nursing care, room revenue	Ward consumables, linen, medical gases
ICU / HDU	ICU daily charges, ventilator, monitoring fees	Specialised drugs, disposables, IV lines
Dietary	Patient meal billing, special diets	Food provisions, kitchen consumables
Emergency	A&E consultation, resuscitation billing	Crash trolley restocking, emergency drugs

Cross-reference Financial tab unit reports with the Finance module (/financials) for journal detail, trial balance, and OHADA-compliant statements.

12. Permissions & Access Control

Director module visibility is entirely permission-driven. Administrators configure access at `/hms-admin/access` .

Permission layers

Layer	Example permissions	Effect
Module entry	<code>hms_reports.read</code> , <code>director.dashboard.read</code>	Can open management reports or director portal
Full suite	<code>hms_reports.full</code>	All tabs, cards, KPIs, and panels
Section tab	<code>hms_reports.daily</code>	Entire Daily tab in management reports
Individual card	<code>hms_reports.daily.census</code>	Single report card only
Dashboard tab	<code>director.dashboard.tab.revenue</code>	Revenue tab on daily dashboard
KPI widget	<code>director.dashboard.kpi.beds</code>	Bed occupancy KPI tile
Panel widget	<code>director.weekly.panel.doctor_perf</code>	Doctor performance panel

Granting access — step by step

- 1

Open `/hms-admin/access` and select the target role (e.g. Hospital Director, Assistant Director).
- 2

Under **Permissions**, enable `hms_reports.read` or `hms_reports.full` .
- 3

Grant section permissions (`hms_reports.daily` , etc.) or individual card permissions as needed.
- 4

Under **UI visibility**, enable director dashboard KPIs, panels, and tabs.
- 5

Assign the **director** portal as home portal under **Role portals**.
- 6

Save — user sees changes on next page load.

Role profiles

Deployment bootstrap may auto-grant director permissions to roles matching *Hospital Director*, *CEO*, or *Medical Director* titles. Custom roles require manual ACL configuration.

13. Print & Export

Management reports support professional print and PDF export for board packs, ministry submissions, and archival.

Print options

Action	URL	Output
Print current tab	/management-reports/print?scope=tab&tab=daily	Print-optimized view of active tab
Full PDF suite	/management-reports/print?scope=all	All granted sections in one document

Print workflow

- 1 Navigate to /management-reports and select the desired tab.
- 2 Click **Print tab** in the hero actions bar — opens print view in new tab.
- 3 Use browser Print (Ctrl+P) → Save as PDF for archival.
- 4 For comprehensive packs, click **Full PDF** to include all granted sections.
- 5 Print CSS hides navigation, buttons, and screen chrome — only report content prints.

Director portal React views can be printed from the browser when presenting daily/weekly/monthly dashboards in meetings.

14. Assistant Director Portal

The **Assistant Director** portal at `/portal/hub/assistant-director` provides operational oversight with a focused subset of director capabilities — ideal for deputy directors and clinical operations managers.

Dashboard tabs

Tab	Focus
Overview	Patients today, bed occupancy, ER wait, revenue, pending lab, patient flow, critical alerts
Bed map	Ward bed occupancy grid
Patient flow	Admissions and discharges today
Revenue	Collected today, collection rate
Reports	Lab alerts, pharmacy alerts digest

Portal tiles

- Assistant dashboard (home)
- Management reports — `/management-reports`
- Ward board — `/wards`
- OPD queue — `/opd-queue`

Assistant Director permissions use the `assistant_director.*` namespace. Grant via Access Control without giving full `hms_reports.full` if financial detail should remain restricted.

15. Secretary Portal

The **Director's Secretary** portal at `/portal/hub/secretary` supports executive administration — calendar management, hospital briefings, correspondence, and read-only management reports.

Dashboard tabs

Tab	Content
Director briefing	Hospital pulse, OPD visits today, available reports, management report links
Calendar	Director schedule, appointments today, meetings to schedule
Correspondence	Correspondence queue, visitors & calls log, staff directory

Portal tiles

 Secretary dashboard	 Director calendar	 Management reports	 Director portal
 Patient lookup	 Staff directory	 OPD briefing	 Visitors

Secretary roles typically receive `secretary.reports.read` and `hms_reports.read` for read-only report access — sufficient to prepare briefing packs without editing clinical or financial data.

16. Executive Decision Workflows

Morning operational review

- 1 Open Director Portal → Daily dashboard.
- 2 Review bed occupancy and ER wait KPIs — escalate if thresholds exceeded.
- 3 Check Critical alerts panel — deaths, ICU census, incidents.
- 4 Switch to Management Reports Daily tab for narrative detail on census, theatre, pharmacy.
- 5 Share key figures in stand-up or secretary briefing pack.

Weekly leadership meeting

- 1 Open Weekly Performance Report (portal tab or management reports Weekly tab).
- 2 Compare patient volume and occupancy vs. prior week.
- 3 Review HR staffing card — address absenteeism and overtime trends.
- 4 Discuss quality & safety incidents and supply chain alerts.
- 5 Print weekly tab for meeting minutes attachment.

Monthly board pack

- 1 Generate Monthly P&L from director portal.
- 2 Export Management Reports monthly tab (Print → Full PDF).
- 3 Include clinical performance and patient satisfaction cards.
- 4 Cross-check with Finance module statements (/financials).
- 5 Present annual scorecard if quarter-end or year-end.

Capacity & escalation triggers

Signal	Typical threshold	Action
Bed occupancy	> 90%	Review pending admissions, consider overflow wards
ER wait	> 60 min average	Deploy additional doctor, review triage staffing
Pending lab	Spike vs. baseline	Escalate to lab supervisor, check equipment
Pharmacy stock alerts	Critical items	Approve emergency procurement
Collection rate	< 80%	Finance review — billing gaps, insurance delays

17. Module Integration

Director dashboards aggregate data from across ZAIZENS Integrated HMS. Understanding source modules helps interpret figures and trace discrepancies.

Source module	Data contributed	Director touchpoint
OPD / Front Desk	Visit counts, queue times, no-shows	Daily OPD card, patient flow KPIs
Emergency / A&E	ER cases, triage wait, resuscitation billing	ER wait KPI, daily OPD & emergency card
IPD / ADT	Admissions, discharges, bed occupancy, ALOS	Census card, bed map, flow panels
Cashier / Billing	Collections, receipts, outstanding balances	Revenue KPIs, daily revenue, financial tab
Pharmacy	Dispensing, stock levels, consumption	Pharmacy card, pharmacy alerts panel
Laboratory	Test volume, TAT, critical results	Lab card, pending lab KPI, lab alerts
Radiology	Imaging volume, report turnaround	Lab & radiology weekly card
HR / Payroll	Attendance, leave, payroll costs	HR staffing card, monthly payroll panel
Finance / GL	Journal postings, P&L, AR ageing	Monthly P&L, financial tab, unit economics
Procurement	POs, goods received, supplier payments	Supply card, weekly procurement report

Related manuals: [/docs/cashier-users-manual](#) , [/docs/ipd-users-manual](#) , [/docs/nursing-users-manual](#) , and the Comprehensive User Guide at [/docs/comprehensive-user-guide](#) .

18. Screen Reference

Screen	Route	Primary users
Director portal hub	/portal/hub/director	CEO, Hospital Director, Medical Director
Director portal (weekly)	/portal/hub/director?report=weekly	Executive team
Director portal (monthly)	/portal/hub/director?report=monthly	Board, CFO
Director portal (annual)	/portal/hub/director?report=annual	Board, ministry reporting
Live management reports	/management-reports	All executive roles
Management reports (tab)	/management-reports?tab=financial	CFO, Finance Director
Print view	/management-reports/print?scope=all	Secretary, board prep
Reports hub	/hms-reports	Cross-module report navigation
Assistant Director portal	/portal/hub/assistant-director	Deputy directors
Secretary portal	/portal/hub/secretary	Director's secretary
Ward board (reference)	/wards	Bed capacity verification
Financial module	/financials	Detailed GL and statements
Access control	/hms-admin/access	Administrators
This manual	/docs/director-users-manual	All director module users

19. Troubleshooting

Issue	Likely cause	Resolution
No reports assigned	Role lacks <code>hms_reports.*</code> permissions	Administrator grants <code>hms_reports.read</code> plus section permissions in Access Control
Empty dashboard / missing KPIs	UI visibility not granted for KPI/panel codes	Enable <code>dir.kpi.*</code> and <code>dir.panel.*</code> under UI visibility for the role
Live figures could not be loaded	Database query error or missing schema	Check server logs; run migrations; contact IT support
Revenue mismatch vs. cashier	Timing — dashboard may use posted date vs. transaction date	Compare with <code>/billing</code> and Finance GL for reconciliation
Bed occupancy seems wrong	Beds not marked Available/Occupied on ward board	Verify ADT bed status at <code>/wards</code>
Print shows blank sections	Tab not granted — print respects same ACL as screen	Grant section permission or use Full PDF with <code>hms_reports.full</code>
Wrong portal on login	Home portal not assigned to director portal	Set <code>/portal/hub/director</code> as home under Role portals
Weekly/monthly tabs missing	Section permissions not granted	Grant <code>director.weekly.read</code> , <code>director.monthly.read</code> , or <code>hms_reports.weekly/monthly</code>

For persistent data issues, capture the report reference (# chip in management reports header) and generated-at timestamp when contacting support — this helps trace the live query batch.

20. Glossary

Term	Definition
ALOS	Average Length of Stay — mean days from admission to discharge
Bed occupancy	Percentage of operational beds currently occupied
Board pack	Compiled set of reports for governance meetings
Collection rate	Collected revenue ÷ billed revenue (%)
Cost centre / unit economics	Revenue and cost tracking per hospital department (pharmacy, lab, etc.)
EBITDA	Earnings Before Interest, Taxes, Depreciation, and Amortization
HAI	Healthcare-Associated Infection — nosocomial infection rate
KPI	Key Performance Indicator — headline metric on dashboards
Management reports	Live catalogued report suite at /management-reports
P&L	Profit and Loss statement — revenue minus expenses
Scorecard	Multi-domain performance summary (especially annual)
TAT	Turnaround Time — e.g. lab result from order to finalize
Unit economics	Sales vs. purchases analysis per clinical cost centre
AR ageing	Accounts Receivable analysed by days outstanding (30/60/90)
